

The Gender Pay Gap: Michigan

Updated September 2014

According to the most recent statistics from the U.S. Census Bureau, the median earnings for U.S. women working full time, year-round were just 78 percent of U.S. men’s median earnings—a gap of 22 percent. Progress to close the gap has stalled during the last decade and the gap is even larger for women of color and for moms. This pay gap begins early in women’s careers. According to AAUW’s research report [Graduating to a Pay Gap](#), women only one year out of college, working full time, were paid on average just 82 percent of what their male counterparts were paid. After controlling for hours worked, occupation, college major, employment sector, and other factors associated with pay, the gap shrinks but does not disappear. About 7 percent of the gap cannot be explained by these factors commonly understood to affect earnings.

More than 50 years after passage of the Equal Pay Act of 1963, it’s clear the pay gap is unlikely to go away on its own. That’s why the American Association of University Women and its more than 170,000 members and supporters are leading a nationwide campaign to close the pay gap and end pay discrimination. Go to [FightForFairPay.org](#) for more information.

Median earnings for men in Michigan were \$49,449 compared to women’s median earnings of \$37,258 — an earnings ratio of just 75 percent.

Member of Congress*	District	Men	Women	Earnings Ratio**	Ranking in State***
Benishek (R)	MI-1	\$41,422	\$31,666	76%	9
Huizenga (R)	MI-2	\$45,548	\$34,556	76%	9
Amash (R)	MI-3	\$46,538	\$37,103	80%	3
Camp (R)	MI-4	\$42,121	\$32,568	77%	7
Kildee (D)	MI-5	\$41,809	\$33,139	79%	4
Upton (R)	MI-6	\$45,552	\$34,888	77%	7
Walberg (R)	MI-7	\$49,343	\$37,598	76%	9
Rogers (R)	MI-8	\$61,389	\$43,025	70%	13
Levin (D)	MI-9	\$50,805	\$40,171	79%	4
Miller (R)	MI-10	\$51,967	\$38,234	74%	12
Bentivolio (R)	MI-11	\$68,858	\$46,687	68%	14
Dingell (D)	MI-12	\$53,009	\$41,149	78%	6
Conyers (D)	MI-13	\$37,103	\$32,002	86%	1
Peters (D)	MI-14	\$48,969	\$40,429	83%	2

*The above congressional districts represent the 113th Congress.
**The pay gap figures are from 2013, the most recently available data.
***The congressional districts are ranked from smallest gap to largest.

AAUW. (2014). *The Simple Truth about the Gender Pay Gap*. www.aauw.org/research/the-simple-truth-about-the-gender-pay-gap/. The pay gap is the difference in men’s and women’s typical earnings, usually reported as either the earnings ratio between men and women or as an actual pay gap. The median value is the middle value, with equal numbers of full-time workers earning more and earning less. In 2013, median annual earnings in the U.S. for women and men working full time, year-round were \$39,157 and \$50,033, respectively.

The Fight for Pay Equity: A Road Map

With a record number of women in the workforce and two-thirds of women functioning as primary or co-bread winners for their families, equal pay for women is critical to families' economic security.¹ **Yet in 2013, women working full-time, year round, were still paid 78 cents on average for every dollar paid to men.**² Even after controlling for factors known to affect earnings, such as occupation, college major, and hours worked, a 7 percent pay gap persists between male and female college graduates just one year after graduation.³ Both legislative and executive action is needed to enable women to bring home the pay they have rightfully earned.

Pass the Lilly Ledbetter Fair Pay Act. Passing this bill was a crucial victory in 2009, and it was the first bill President Obama signed into law. It helped regain ground lost due to a horrible Supreme Court decision. While the Ledbetter Act reinstated employees' ability to have their day in court, we need further action to give employees and employers the tools they need to close the pay gap.

Rescind harmful Bush-era regulations. In February 2013, the Office of Federal Contract Compliance Programs announced that it would rescind Bush-era policies that have, for nearly seven years, hampered its efforts to combat pay discrimination. They also provided new guidance to explain how the agency will investigate such discrimination going forward.

Issue an executive order prohibiting retaliation against federal contractors who talk about their salary with their co-workers. President Obama signed this order on Equal Pay Day (April 8, 2014). This executive order addresses one piece of the Paycheck Fairness Act—protecting nearly a quarter of the federal civilian workforce despite congressional gridlock.

The executive branch will collect wage data from employers including the race, sex, and national origin of federal contractors. The Department of Labor and Equal Employment Opportunity Commission (EEOC) will develop the necessary tools to collect this information and support enforcement. President Obama signed this order on Equal Pay Day (April 8, 2014).

Pass the Paycheck Fairness Act (S. 84/2199 and H.R. 377), a much-needed update to close loopholes in the Equal Pay Act of 1963. It would create incentives for employers to follow the law, empower women to negotiate for equal pay, and strengthen federal outreach and enforcement efforts. The bill would deter discrimination by strengthening penalties for equal pay violations and prohibiting retaliation against workers who inquire about employers' wage practices or disclose their own wages.

Pass the Fair Pay Act (S. 168/H.R. 438) to require employers to provide equal pay for work of equal value. While the Paycheck Fairness Act would ensure women are not paid less than men who hold the same job, the Fair Pay Act would require employers to provide equal pay for jobs that are *comparable* but not identical—such as jobs requiring comparable education, skills, responsibilities and working conditions. This bill is critical to addressing gender-based job segregation that lowers women's wages.

We've already checked off four steps, and we won't stop until all workers have fair pay!
